

April 4, 2011 • Vol. 67 No. 10

# April is Donate Life Month

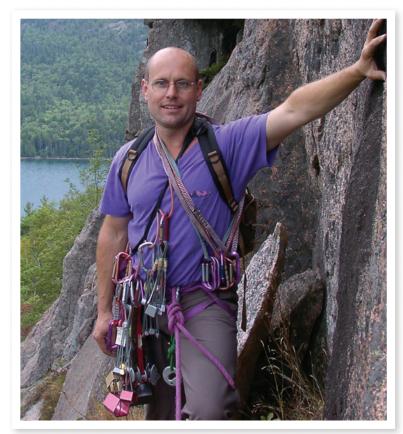

Transplantation is one of the most remarkable success stories in the history of medicine. But despite continuing advances in medicine, the need for organs and tissue is vastly greater than the number available for transplantation. Each day in the United States, 18 people die waiting for transplants that cannot take place because of a shortage of donated organs.

At Hartford Hospital, we honor those who make the final act of love and generosity to people they don't know by giving the gift of life through organ and tissue donation.

Top Right: Doug Zimmerman was a registered organ donor. After his death last summer, his last act was to give the gift of sight and healing to others with the tissues he donated.

Bottom Right: Doug Zimmerman's wife Bet, and his parents Larry and Joan Zimmerman, participated in the flag raising ceremony at Hartford Hospital hours after Doug passed away. The hospital flies the flag for two days to honor the donor and his gift.

# Donate Life: Doug Zimmerman's "Gift That Keeps On Giving"

Doug Zimmerman left his family and friends with wonderful memories of a life well-lived.

Doug Zimmerman of Woodstock, Connecticut had registered as an organ donor when he got his driver's license. He told his wife Bet that he believed donation was "the ultimate in recycling," and a good way to give back to others. That is how he lived his life: Doug, who worked for the Department of Environmental Protection for 27 years, had "active hero" status with the Red Cross because he had donated more than 65 units of blood during his lifetime.

So on June 8, 2010, when Doug passed away at Hartford Hospital at the age of 52 after a sudden cardiac event, Bet knew without question that he would want to be a donor.

Staff in the Emergency Room contacted LifeChoice Donor Services, the local organ procurement organization. Sheila Murphy, tissue

coordinator for LifeChoice, joined Bet and discussed the options.

"Sheila patiently and gently explained to me how many people tissue donation could help, and what the tissues could be used for," Bet said. "She answered all my questions. I asked Doug's parents if they were okay with his choice, and they said they were, so I signed off on the consent form. This process and decision was not hard for me. At that point, his body was just a shell."

Because his heart had stopped out in the field, Doug was unable to donate organs, but he was able to be a tissue donor and will help countless people with his corneas, bones, veins, skin and tissue.

"The thought that his gift might be helping others is one of the only things that gives me solace right now," said his wife Bet. "It helps to know that someone else might be looking through the lenses of his eyes, flexing his muscles, or walking on his bones. He didn't need them anymore. Someone else out there desperately does."

Doug left his family and friends with wonderful memories of a life well-lived. His generosity of spirit and zest for life did not end with his last breath. Through the gift of tissue donation, Doug continues to impact the lives of people he did not know, but to whom he gave a precious chance to live and enjoy life, hopefully as well as he did.

"Doug was a very special, generous man," Bet said. "His last act was to give the gift of sight and healing to others. He had the ability to help approximately 50 people with the muscles, veins, bone and other tissues he donated. This is good news, and there is not much of that around here lately."

Each year, tissue donors like Doug help more than 1,000,000 people. But right now, more than 100,000 people are waiting for organ transplant, and 18 die every day. Bet Zimmerman hopes that part of her husband's legacy will be calling attention to the problem and inspiring others to become donors.

"Immediately after we lost Doug, my brother signed up as an organ donor," Bet said. "I think Doug would be proud. I know I am. I hope others will learn more about organ and tissue donation, and seriously consider leaving such a legacy."

# The thought that his gift might be helping others is one of the only things that gives me solace right now.

#### The Donate Life Flag

When a patient dies at Hartford Hospital, and then goes on to give the gift of life through organ and/ or tissue donation, we raise the "Donate Life" flag in front of the main hospital entrance, and fly it for two days in their honor. Staff members are invited to join the donor's family and friends at the flag raising, and an image of the flag is broadcast on the in-hospital digital screens.

The flag raising means a great deal to the families, said Jami Tyska, our in-house donation coordinator. It did to Bet Zimmerman and her family.

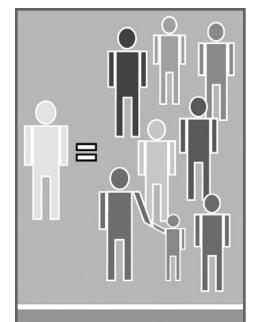

"Doug's parents and I went outside into the sun, and they let his mom and I crank up the flag," Bet said. "It was hard, but I was gladdened by at least one positive aspect of this tragedy."

On April 1, to mark National Donate Life month and honor all Hartford Hospital organ and tissue donors, the Donate Life flag was raised at a ceremony attended by staff, donor families, and recipients. It will fly for the entire month of April.

"We want to honor people like Doug Zimmerman, and his wife and family, whose generosity gives hope – and new life – to those who need transplants," Jami said.

"I am glad Doug was an organ and tissue donor. I am glad that we talked about it before he left," said Bet Zimmerman. "Every new person who knew Doug who signs up for organ donation now is carrying on his legacy. As Doug would say, 'It's the gift that keeps on giving."

Editor's Note: For more about Doug, see www.cragman.com.

One organ donor can save 8 lives.

Register *now* to become an organ and tissue donor at www.organdonor.gov.

## In 2010:

- 19 people became organ donors at Hartford Hospital.
- 62 organs were donated: 7 hearts, 7 lungs, 30 kidneys, 16 livers, and 2 pancreases.
- 27 organs went to recipients at Hartford Hospital.

### Becoming a Donor

Organ and tissue donation and transplantation provide a second chance at life for thousands of people each year. You have the opportunity to make these miracles happen. By deciding to be a donor, you give the gift of hope for the thousands of individuals awaiting organ transplants, and for the millions of individuals whose lives could be enhanced through tissue transplants. To register as an organ, tissue, and eye donor, go to: http://www.organdonor.gov

# Hartford Hospital Ranks First in Region in U.S. News & World Report's Best Hospitals Metro Area Rankings

Hartford Hospital has been ranked number one in the Hartford area in U.S. News & World Report's firstever Best Hospitals Metro Area rankings.

The new rankings recognize 622 hospitals in or near major cities with a record of high performance in key medical specialties. There are nearly 5,000 hospitals nationwide.

Twenty years ago, U.S. News created Best Hospitals rankings to identify institutions exceptionally skilled in handling the most difficult cases, and currently identifies 152 hospitals as the best in the nation. The new metro area rankings just announced are more relevant to a wider range of health

care consumers, whose care may not demand the special expertise found only at a nationally ranked Best Hospital.

Most patients will have a far better chance of finding one of these top-performing hospitals in their health insurance network, and closer to home.

"Hartford Hospital is proud to be named the region's top hospital. This prestigious honor reflects our commitment to providing the most innovative and complex care, with an unmatched level of service," said Elliot Joseph, President and CEO of Hartford Hospital.

To be ranked in its metro area, a hospital had to score in the top 25

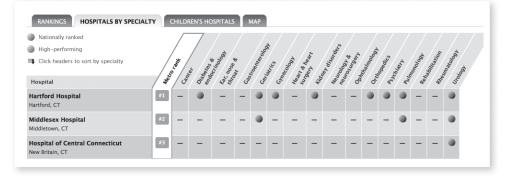

percent among its peers in at least one of 16 medical specialties.

Hartford Hospital was recognized as "High-performing" in eight specialties: diabetes and endocrinology, geriatrics, gynecology, kidney disorders, orthopedics, psychiatry, pulmonology, and urology.

"The new Best Hospitals Metro rankings can tell you which hospitals are worth considering for most medical problems if you live in or near a major metro area," says U.S. News' health rankings editor Avery Comarow. "All of these hospitals provide first-rate care for the majority of patients, even those with serious conditions or who need demanding procedures."

Also on the Best Hospitals in Metro Hartford list were Middlesex Hospital, ranked number two with three high-performing specialties, and The Hospital of Central Connecticut, ranked number three with one high-performing specialty.

For the full list of metro area rankings, visit www.usnews.com/hospitals.

## **CONNECT** with Planning & Marketing

# Medical Mission: Staff Members Volunteer for Surgeries in Ecuador

From hands, to hearts, to minds towards peace

A team of seven members of the staff spent eight days in February in Latacunga, Ecuador as medical volunteers under the aegis of the nonprofit organization Hands Across the World.

They spent the time doing a total of 98 plastic surgery and hand surgery cases, including cleft lip/cleft palate repairs, congenital and post-traumatic hand repairs, burn surgery, and microtia repairs.

The medical volunteers were Drs. Alan Babigian, Charles Castiglione, Chris Hughes, and Anselm Wong; registered nurses Tembra Gregus and Michael Bafuma, and surgical technologist Timothy Gregus.

"We have established a network of physicians in Ecuador that we work with, who help us with the postoperative care of our patients after we leave," said Dr. Babigian, a plastic and reconstructive surgeon from the Connecticut Surgical Group. He is on the board of director of Hands Across the World, and this was his sixth trip to the same region since 2001.

"We see a number of familiar patients every time we return," said Dr. Babigian. "I, for one, have grown very attached to the people of this region - they are truly nice, happy, gracious people despite their extremely poor socioeconomic situation."

Dr. Castiglione is director of plastic surgery at Hartford Hospital and chief of the Department of Plastic Surgery at Connecticut Children's Medical Center. This was his second trip to Ecuador since 2009

They plan to return to Ecuador in 2013.

Team members pay their own way on the medical missions. All of the medications, materials, and other expenses are entirely covered by private and corporate donations to Hands Across the World.

#### Hartford Hospital Presents Service Awards - March 2011

#### **40 YEARS**

Arija Agostino was congratulated on her 40 years of service by her co-workers from Radiology.

#### **40 YEARS**

Margery Dery was congratulated on her 40 years of service by her co-workers from the West Hartford Surgery Center.

#### **40 YEARS**

Catherine Jeffery was congratulated on her 40 years of service by her co-workers from the Operating Room.

#### 25 YEARS

Marc Rousseau, Diane Michaud and Martha Ringrose were congratulated for a quarter century of service.

#### Hartford Hospital Presents Service Awards - March 2011

#### 20 YEARS

Twenty-year pin recipients were Michael Richards, William Morin and Diana Niro.

# Congratulations and Welcome to your Pin Ceremony Galayou gas The state of the sta

#### 15 YEARS

Shiela Ash and Daisy Rodriguez celebrated 15 years of service.

#### 10 YEARS

Being congratulated for 10 years of service are: Front row, left to right: Denise Taylor, Janet Karp, Gladys Flores, Collette Willard and Luis Oyola.

**Back row**, left to right: Judy Boykins, Sandra Brown, Staci Beamon, Kristen Beaupre, Clara Riley, Frank Palumbo and Crestina Walker.

#### **5 YEARS**

Jeffrey Flaks, executive vice president and chief operating officer (back row, far left) and President Elliot Joseph (back row, far right) congratulate all the five-year award recipients:

Front row, left to right: Monique Gray, Patricia Simonowicz, Kelly Rider, Monique Roy, Kimone White, Lynn Yaglowski and Lidia Scodella.

Middle row, left to right: Yolanda Johnson, Beatrice Resto, Samuel Vega, Valentina Moore and William Joughin.

Back row, left to right: Ruth Amador, Leoner Fontanez, Sanjay Banerjee, Nelis Bido-Jimenez, Alison Champagne, Garret Condon and David Johnson.

#### **VOLUNTEER**

Gabriel Morales, center, was congratulated for 500 hours of volunteer service by (left to right): Jeff Flaks; Danian Harper from the Ambulatory Surgery Center; Kelley Boothby, codirector of volunteer services; and Elliot Joseph.

# Spring is Here; Volunteer!

With the return of good weather, many organizations hold events to raise awareness of certain diseases or money for life-saving medical research. Join your friends and coworkers from Hartford Hospital at any of these four events - you could help save lives!

#### April 10: Walk for Multiple Sclerosis Research

Teams from Hartford Hospital will participate in the 5-mile "Walk to Create a World Free of MS," which raises awareness and funds for research for Multiple Sclerosis. It will be held on Sunday, April 10, in 12 sites around the state: Brooklyn Community, Cheshire, Clinton, Enfield, Litchfield, Manchester, New London, Simsbury, Stamford, West Hartford,

West Haven and Westport. Registration opens at 8 a.m.; the walk starts at 9 a.m. at all locations. A free Subway lunch will be provided after the walk. Please register by April 3. Rose Jacobs, a PA in surgery, is coordinating a team. Contact her at rjacobs@harthosp.org, or call 860-844-8939 (cell 860-202-9057).

#### April 13: "Be The Match" Bone Marrow Donor Drive

Every day, patients with leukemia hope for a volunteer donor who can make a bone marrow transplant possible or them. Seventy percent of patients don't have a donor in their family, so they depend

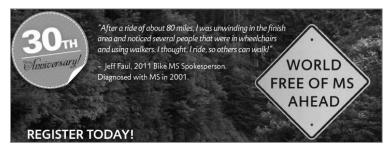

on strangers who have joined the national registry of potential donors. There will be a drive to screen new donors for entry in the "Be The Match" Registry at the Helen & Harry Gray Cancer Center on Wednesday, April 13, from 12 noon to 7 p.m. in the Taylor Conference Room. You must be between the ages of 18 and 60 and meet the health guidelines to participate. At the drive you will complete a registration form and have your cheek swabbed so your tissue type can be determined. If you match a patient in the future, you will be asked to donate either bone marrow or cells from circulating blood. It's not as painful as some people think, and you could save someone's life. For more information, contact Susan Peck from cancer nursing at 860-545-3497, or visit BeTheMatch.org.

#### May 1: March of Dimes March for Babies

Women's Health Services is sponsoring a Hartford Hospital team in the March of Dimes March for Babies on Sunday, May 1 at Rentschler Field in East Hartford. This fun walkathon will raise money for important research and programs that help babies begin healthy lives. **You can register online** 

at marchforbabies.org and include the team name "Women's Health Services, Hartford Hospital," or go to Hartford Hospital's table on the day of walk. For more information contact Donna Phelan, a nurse on Bliss 6, at 860-545-2167.

#### June 5: Bike MS

Join the Hartford Hospital team of cyclists on June 5 in the 30th annual Bike MS: bkm/Steelcase Ride starting in Windsor. You can choose to ride 10, 25, 50 or 100 miles. For the past 29 years this ride has seen over 27,000 cyclists pedal to raise over \$6 million to benefit the more than 6,000 people affected by multiple sclerosis living in Connecticut. Participants

can register at www.bikemsconnecticut.org; make sure to register with the "Hartford Hospital Cyclists" team. For more information contact team captain Suzanne Femino, an APRN from the Child and Adolescent Outpatient Clinic, at 860-545-7717 or sfemino@harthosp.org.

# Research Rundown: www.harthosp.org/research

"Research is to see what everybody else has seen, and to think what nobody else has thought."

~ Albert Szent-Gyorgyi, 1937 Nobel Prize for Medicine

#### **HHC System Moving Forward to Increase** Research Volume

The Hartford Health Care Institute for Research is becoming a reality. The executive board of the Institute is in the beginning stages of allocating the \$9,000,000 set aside by the System, for the purpose of increasing research volume over the next 5 years. In addition the Midstate Medical Center IRB will be combined with Hartford Hospital's IRB to better facilitate research growth within the System.

#### **Internal Funding Update**

Requests for support through the Small Grants program (for research projects requesting \$10,000 or less) may be submitted at any time through the Research Program's online form system. The goal of the Small Grant program is to provide seed money for pilot projects with the potential to generate external research support. Medical Staff funding is also available to support data analysis and database development through the Research Program. Contact Ilene Staff, PhD (545-0178) for more information.

#### The following projects were supported through the generosity of the Hartford Hospital Medical Staff:

- Shameem Azizad, MD (Radiology): "Low Dose CT Protocol for Cystic Fibrosis Patients"
- Louise McCullough MD (Neurology): "Variability in Stroke Outcomes Across the Population"
- Inam Kureshi, MD (Neurosurgery): "Craniotomy for Intraventricular Lesions"
- Andrew Salner MD (Oncology): "Clinical and Quality of Life Outcomes Following Diagnosis of Prostate Adenocarcinoma"
- Michael Sahjian RN (Emergency Medicine): "Needle Decompression"
- Brent Suozzi MD (Urogynecology): "Do Urogynecologists Hate Fractions?"

#### The following publications were supported through the generosity of the Hartford Hospital Medical Staff: Schimpf, M.O., Tulikangas, P.K., O'Sullivan, D.M., LaSala, C.A., Jacob, M.C., and Egan, J.F.X. Characteristics of nulliparous women who would consider Cesarean delivery on maternal request. Connecticut Medicine, in press, April, 2011.

Ayirala, S., Kumar, S., O'Sullivan, D.M., and Silverman, D.I. Echocardiographic predictors of left atrial appendage thrombus formation. Journal of the American Society of Echocardiography, in press, 2011.
